ELECTRONIC IMAGING IN ASTRONOMY
DETECTORS AND INSTRUMENTATION

REPRINT PDF - Search results, An image

sensor or imaging sensor (also: imager) is a sensor that detects and conveys the

information that constitutes an image. It does so by converting the variable attenuation of

light waves (as they pass through or reflect off objects) into signals, small bursts of

current that convey the information., A charge-coupled device (CCD) is a device for

the movement of electrical charge, usually from within the device to an area where the

charge can be manipulated, for example conversion into a digital value., View
