Old age refers to ages nearing or surpassing the life expectancy of human beings, and is thus the end of the human life cycle. Terms and euphemisms include old people (worldwide usage), seniors (American usage), senior citizens (British and American usages), older adults (in the social sciences), the elderly, and elders (in many cultures

including the cultures of aboriginal people).

Fecal incontinence (FI), also known as anal

incontinence, or in some forms encopresis, is a lack of control over defecation, leading to involuntary loss of bowel contents

including flatus (gas), liquid stool elements and mucus, or solid feces. FI is a sign or a symptom, not a diagnosis. Incontinence can result from different causes and might occur with either constipation or diarrhea.
