... CASARETT AND DOULL's Toxicology:

The Basic Science of Poisons.,

Organophosphate Insecticides

Organophosphates (OPs) are a class of

insecticides, several of which are highly

toxic. Until the 21st century, they were

among the most widely used insecticides

available. Thirty-six of them are presently

registered for use in the United States, and

all can potentially cause acute and subacute

toxicity., fast-acting insecticides (neurotoxics

and inhibitors of respiration) and slow-acting

insecticides (Bacillus thuringiensis and insect

growth regulators). The leaf-dip method was

the most efficient method for toxicity studies

of insecticides formulations to T. absoluta.,

Toxicology and Pesticide Use:

Organophosphorus and Carbamate

Compounds summarizes what is known

about these pesticides from wildlife

toxicology literature and discusses the

potential hazards to wildlife by examining toxicity, environmental persistence, and use patterns of the pesticides., director, Pesticide Information Office; ... chronic toxicity of pesticides than is known about their acute toxicity, not because it is of less importance, but
