VAPOR PRESSURE AND ANTOINE  
CONSTANTS FOR HYDROCARBONS  
AND SULFUR SELENIUM TELLURIUM  
AND HALOGEN PDF - Search results,

Vapor pressure or equilibrium vapor pressure is defined as the pressure exerted by a vapor in thermodynamic equilibrium with its condensed phases (solid or liquid) at a given temperature in a closed system. The equilibrium vapor pressure is an indication of a liquid's evaporation rate. It relates to the tendency of particles to escape from the liquid (or a solid)., The Antoine equation is a class of semi-empirical correlations describing the relation between vapor pressure and temperature for pure components. The Antoine equation is derived from the Clausius-Clapeyron relation. The equation was presented in 1888 by the French engineer Louis Charles Antoine (1825-1897)., How to Calculate Vapor Pressure. Have you ever left a bottle of water out in the hot sun for a few hours and heard a slight "hissing" noise when you opened it? This is caused by a principle called vapor

pressure. In chemistry, vapor..., Vapor Pressure Correlations []. Unfortunately, life isn't that simple even when everything is ideal. Vapor pressure is not by any stretch of the imagination a constant., ©2006 Aspen Technology, Inc.
